1933 Temple Avenue
Waste Management :

Each house has a proposed space for three waste carts. On the waste collection day the carts will be placed by homeowners in the designated area along the street curb.

At the present time waste collection is provided by Edco. This is an established procedure.

The Builder and Architect requested Edco review of the proposed waste can's location on the pick-up day. Mr. Sanchez reviewed the proposed location. The proposed placement of carts on the collection day appears to be adequate.

The containers will have designated house number painted with 6" high numbers.

RE: 1933 - 1947 Temple Ave, Signal Hill New project

Option #2 will work placing the carts on Temple Ave.

- Please set out trash containers in your designated collection area on the street with the wheels against the curb or the edge of the roadway. Arrows on the lid should point toward the street.
- Automated carts should be placed at least 2 feet away from each other and obstructions such as parked cars, trees, telephone poles and mailboxes.
- Please be careful not to place carts in areas of traffic, such as bike lanes, in order to avoid blocking paths of travel.

Thank you
