Landscape Architecture

SWA provides complete landscape architectural services, including site planning, concept design, schematic design, design development, construction documentation and construction observation. We often provide our clients with continuing landscape design consultation after construction completion and can provide landscape management plans for their use.

Urban Planning

SWA has extensive experience producing comprehensive land use and master plans for large land areas. Because our work is land-based, we are able to create plans that sensitively make the best use of terrain, landform, natural systems, landscape, and urban spaces, and integrate those elements

with the required infrastructure, buildings, and other improvements. We apply these same skills to projects involving the use and restoration of natural systems.

Urban Design

We offer master planning, preparation of design guidelines, and full design services for urban projects. These urban design and planning services can be applied to entire districts, as well as street and infrastructure systems, public parks and plaza spaces, waterfronts, and the smallest of urban areas. We are skilled at addressing both the redevelopment of an urban area, including infill development and land use changes, as well as the design of new and re-imagined urban environments.

Sub-consultant Management

SWA typically seeks sub-consultant services for the following specialties, and also recognize that the City of Signal Hill encourages at least 5% DBE participation. We have experience working with specializations including: architecture, civil engineering, structural engineering, irrigation engineering, lighting, environmental engineering, soil and geologic testing, survey, water fountain and feature designers, horticulturists, historic renovation and restoration specialties.

Revitalization and Reuse

As skilled urban designers and planners we have experience working with entire downtown districts, as well as street systems, city blocks, public parks and plaza spaces, waterfronts, and recreational facilities.

Revitalization of under-utilized open space is essential to sustaining social, cultural, and civic activities in our cities and regions. This experience has built a proven reputation for bringing challenging assignments to fruition with the ability to integrate multiple concerns – environmental, economic, community – with a strong vision for the ultimate form and function of the project.

Community Engagement

As a team of designers, engineers, and educators, we understand the depth and complexity of executing a

successful community engagement strategy. We anticipate that the City of Signal Hill's stakeholder group will consist of dozens of private individuals, local business owners, parents of school children and/or students from nearby schools, and other major stakeholders who serve a pivotal function for the successful outcome of any effort.

We will emphasize our efforts on providing clear, ongoing, and accessible information to the community as well as capturing, documenting, and processing feedback from the various outreach and communication methods we may choose to utilize, including: public outreach boards, web or paper surveys, and interactive outreach activities.

The key to a successful stakeholder and community engagement event is transparency, communication, and follow-up. We intend to make the three community engagement sessions a clearly laid out, easily accessible, and well documented affair.

Implementation

Our team's strong philosophical commitment to planning, designing, and implementing quality projects offers several advantages. As experienced planners, architects, engineers and landscape architects, we offer the ability to understand the breadth of the entire project and the elements essential to successful realization of the overall design concept.

SWA's field department insures that projects are built to consistently high standards. Besides forming the backbone of the construction observation team, members of the field department are brought on to the team early, and for this project will be a key player throughout development of the Master Plan. Being part of the evolution of a design concept, they can review design development and construction drawings for constructability and design flaws and make more effective and knowledgeable decisions in the field while retaining the integrity of the original design intent.

Quality Control

First, we consider decision making a continuous, interactive process with the Client and the entire Project Team. We update the Client at frequent progress meetings where we assist in setting agendas, frame required decisions, and maintain meeting notes on decisions and directions relevant to our work. Communication is key, and we maintain a continuous and consistent communication structure through

the Project Manager. Development of consensus is achieved through periodic meetings, clear definition of alternatives and the cost involved, and strict adherence to the project schedule.

The second factor is the use of timely, accurate project information and the use of available technology for information exchange with the Client and the entire Project Team. Schedules and project budgets are continuously monitored and updated throughout the project.

The third factor is the involvement throughout the project of experienced Principals and Staff. The Project Manager is responsible for regular in-house review of all information and deliverables. In addition to review by the Project Manager, the Senior Principal periodically reviews all design and planning projects. SWA maintains in-house, field construction personnel who review all landscape cost estimates and budgets.

Our experience in controlling project labor and construction costs comes from our long history of working with cost conscious clients and construction managers.

Cost and Schedule Control

SWA maintains an internal system of checks and balances to insure the quality of finished products and to ensure that client expectations are met at every phase of a project – from concept to punch list. Every project is assigned a Principal-in-Charge whose primary responsibility is to provide overall leadership and experience.

SWA takes quality seriously and to that end, assures the commitment of the Principal-in-Charge throughout the entire duration of the contract. To that extent, clients tell us that when they hire SWA, they are not just getting one principal, but 30 of them. This speaks directly to how SWA shares resources and knowledge to the benefit of the overall quality, thoroughness, and control of the process and documentation.

Project Management

SWA shall work with the City's Project Manager to perform project management activities and provide the full range of landscape architectural services including, but not limited to: coordinating and scheduling meetings to assess stakeholder/user needs; performing preliminary studies; determining required applications, reviews, permits, and bodies of approval necessary on a project per the City's municipal code, developing and reviewing design options; managing the project schedule; defining detailed project scope of work; performing site visits; preparing project documents such as project specifications, plans, bid schedule, and cost estimates; providing 2D and 3D renderings; coordinating between all sub-consultants; and performing quality assurance checks and quality control of all project documents for accuracy, adherence to applicable codes, and completeness.

Project Kick-off

Our aim at the time of project kick-off is to understand past information such as As-Builts and current maintenance regimes.

Clear lines of communication are established early as part of our detailed work plans to facilitate the efficient and effective flow/exchange of information. As part of the project initiation and kick-off, SWA's Project Manager will monitor information transfer, making certain that all critical decisions are actionable with documented issues, responsibilities, and due dates are clearly communicated.

Issue/Risk Management

The SWA Team manages a proven Issue/Risk Management process that fosters consistent and on-going communication between our team members throughout all phases of a project. Our Issue/Risk Management process also ensures the City's program has been fully realized in our planning documents.

A key component to SWA's Issue/Risk Management program is the use of in-house peer review teams. Formal reviews are required for all projects of significant stature and are conducted at least 2 times during the life of the project.

Dedicated Roles

SWA takes quality seriously and to that end, assures the commitment of the Principal-in-Charge throughout the entire duration of the contract. To that extent, clients tell us that when they hire SWA, they are not just getting one principal, but 30 of them. This speaks directly to how SWA shares resources and knowledge to the benefit of the overall quality, thoroughness, and control of the process and documentation.

Regular Team Meetings

We have found that the most effective tool for maintaining quality is ensuring regular communication and check-in points with the project team. Regularly scheduled project meetings provide an opportunity for the Client to review progress, provide necessary guidance for the advancement of each phase, and ensure project deliverables and key

milestones are on track. These meetings will occur with the core project team and Client's management team, and will often include other key department members with expertise on a specific scope area of discussion.

- Meeting Minutes
- Progress Meetings

Written Progress Reports

Written Progress Reports & Checklist - SWA will provide a checklist of deliverables and content at the conclusion of each phase of the project. These checklists ensure that all prerequisite decisions and issues have been addressed prior to initiating the next phase of the project, thus minimizing the need for rework due to untimely decisions.

Throughout the Design Phases of the project, the city's requirements as well as all relevant Standards, Codes and Ordinances are routinely referenced and verified. SWA reviews sub-consultants' materials to verify that their documents indicate consistent and coordinated information meeting the program requirements. In addition, we require each sub-consultant Project Manager to perform checklist reviews of their work while coordinating with the other disciplines. The City's comments are incorporated, and all documentation is confirmed at the conclusion of each step - planning or design - prior to proceeding to the subsequent step.

The reviewers have the authority to require the design team to revise work that does not meet the quality objectives of SWA and the City of Signal Hill.

Community Engagement and Public Meetings

We believe that good communication is the key to a successful project. SWA will undertake our planning process to promote maximum community and stakeholder participation in which key stakeholders can discuss ideas and information, and develop a process for building an ongoing coalition of agencies, communities and major stakeholders for developing a vision for the project.

Community engagements and public meetings are critical for community wide endorsement and to gain the commitment necessary for implementation of the plan.

3.2.11.8 Deductibles and Self-Insured Retentions. Any deductible or self-insured retention must be approved in writing by the City and shall protect the City, its officials, officers, employees, agents, and volunteers in the same manner and to the same extent as they would have been protected had the policy or policies not contained a deductible or self-insured retention.

At least fifteen (15) days prior to the expiration of any such policy, evidence of insurance showing that such insurance coverage has been renewed or extended shall be filed with the City. 3.2.11.10 Failure to Maintain Coverage. In the event any policy of insurance required under this Agreement does not comply with these specifications or is canceled

and not replaced immediately so as to avoid a lapse in the required coverage, City has the right but not the duty to obtain the insurance it deems necessary and any premium paid by City will be promptly reimbursed by Consultant or City will withhold amounts sufficient to pay premium from Consultant payments. In the alternative, City may cancel this Agreement effective upon notice.

3.2.11.11 Acceptability of Insurers. Each such policy shall be from a company or companies with a current A.M. Best's rating of no less than A:VII and authorized to transact business of insurance in the State of California, or otherwise allowed to place insurance through surplus line brokers under applicable provisions of the California Insurance Code or any federal law.

3.2.11.12 Enforcement of Agreement Provisions (non estoppel). Consultant acknowledges and agrees that actual or alleged failure on the part of the City to inform Consultant of non-compliance with any requirement imposes no additional obligation on the City nor does it waive any rights hereunder.

3.2.11.13 Requirements Not Limiting. Requirement of specific coverage or minimum limits contained in this Appendix are not intended as a limitation on coverage, limits, or other requirement, or a waiver of any coverage normally provided by any insurance.

3.2.11.14 Insurance for Subconsultants. Consultant shall include all subconsultants engaged in any work for Consultant relating to this Agreement as additional insureds under the Consultant's policies, or the Consultant shall be responsible for causing subconsultants to purchase the appropriate insurance in compliance with the terms of these Insurance Requirements, including adding the City, its officials, officers, employees, agents, and volunteers as additional insureds to the subconsultant's policies. All policies of Commercial General Liability insurance provided by Consultant's subconsultants performing work relating to this Agreement shall be endorsed to name the City, its officials, officers, employees, agents and volunteers as additional insureds using endorsement form ISO CG 20 38 04 13 or an endorsement providing equivalent coverage. Consultant shall not allow any subconsultant to commence work on any subcontract relating to this Agreement until it has received satisfactory evidence of subconsultant's compliance with all insurance requirements under this Agreement, to the extent applicable. The Consultant shall provide satisfactory evidence of compliance with this section upon request of the City.
